

PowerWood is proud to be the primary supplier of cedar for Sprenger Midwest, offering a steady supply of premium Western Red Cedar products at competitive prices.

Our state-of-the-art facility in Agassiz, British Columbia, Canada, specializes in producing a wide range of finished products, including Western Red Cedar, Alaskan Yellow Cedar, and Western Hemlock. With a vertically integrated operation, we oversee every stage of production—from sourcing raw materials to delivering expertly crafted, high-quality products to you.

At PowerWood, we transform nature's finest building materials to meet Sprenger Midwest's exact specifications.

### ARCHITECT KNOTTY DIMENSION

Each piece of material, primarily sourced from logs harvested across British Columbia, undergoes a meticulous inspection during the saw-milling process. It is carefully evaluated for acceptable characteristics and consistent sizing.

With diverse uses for our knotty fibers, we maintain a substantial and varied inventory. On-site customization allows us to transform full-sawn dimensions, ranging from 2x4 to 2x12, into premium decorative applications. Through kiln drying, high-quality surfacing, and refined finishes with eased edges, we create materials that meet the highest standards.

### APPEARANCE TIMBERS

PowerWood's cedar timber stock is carefully curated for its exceptional aesthetic qualities. Our inventory includes both knot-free, clear-grade pieces and visually appealing knotty selections.

To ensure the highest quality, each piece is thoroughly inspected by PowerWood experts before shipping, and custom orders are hand-selected to meet precise specifications. We offer a wide range of timber sizes, from as small as 4x4 to as large as 12x12, with oversize and extended lengths (22' +) available for custom projects.

Nestled on 12.2 acres, PowerWood's expansive facility spans 110,000 square feet. Every product, from inception to completion, is meticulously crafted within the state-of-the-art facility.

PowerWood's commitment to quality is unwavering, supported by an extensive quality control program. This ensures that you consistently receive the precise product you order, providing you with unwavering quality you can rely on.

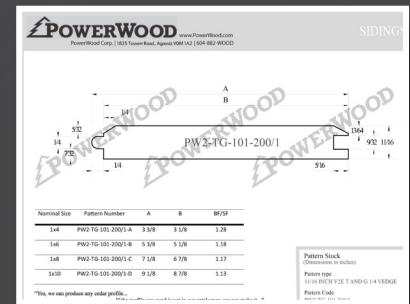

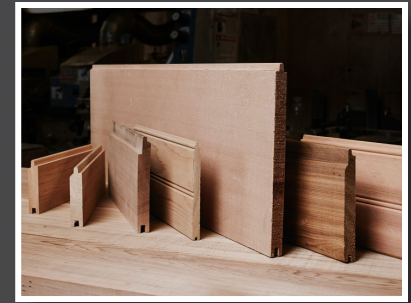

## CUSTOM CEDAR PATTERNS

PowerWood makes quality 1x4 to 1x8 end matched T&G. We also have a large catalogue of pattern options for 1X4 1X6, T&G, 1X8 channel siding and more!

There is no limit on patterns we can produce as we can customize patterns for your needs:

## WE OFFER #2 & BTR NO HOLE ROUGHERHEADED GREEN WESTERN RED CEDAR

We have regular runs of two inch rougherheaded cedar. With our Stetson Ross line and regular supply of coastal cedar material, we are well positioned to sell full packs and full truck loads of competitively priced #2 & BTR No Hole. We produce a quality board that is always well received by our customer base.

To ensure top-notch quality, PowerWood experts thoroughly inspect each piece before shipping, guaranteeing that custom orders meet precise specifications. We stock a wide range, from 2X4 through 2X12. Just tell us your building needs and we'll size up the situation right there on the spot.
